Meet Our Teachers

Bappaditya Banerjee

Utsav Sengupta

Bappaditya is a senior software engineer at Microsoft with over 20 years of experience in software development. He is an expert in multiple programming languages and has worked on various high-level projects throughout his career. Bappaditya is passionate about teaching and has dedicated a significant part of his career to coaching aspiring coders. With his wealth of knowledge and experience in the industry, he guides his students to understand coding concepts in-depth and prepares them for real-world software development. In addition, Bappaditya is also an avid chess player. He uses his strategic and analytical skills gained from chess to enhance his teaching methods, making his classes engaging and thought-provoking.

Utsav is a Senior Consultant at Tata Consultancy Services, with over 15 years of experience in software development. He has worked on a diverse range of projects, gaining extensive knowledge in various programming languages and software development methodologies. Along with his professional commitments, Utsav has spent over 5 years as a chess coach, nurturing young minds to master the game. His unique teaching approach blends technical know-how with strategic gameplay, fostering a comprehensive learning environment for his students. Utsav's extensive experience in both software development and chess coaching positions him perfectly to guide students in our Coding and Chess classes. He is committed to helping students develop their problem-solving skills, strategic thinking, and a love for learning.

Our teachers provide a comprehensive, engaging, and enjoyable learning experience. Their combined expertise in coding and chess, along with their passion for teaching, ensures that our students receive the best instruction possible.
